

## Example programs for Module 8 – Overloading Operators, Friends, & Trees

Example 1	Time folder Time.h Time.cpp main.cpp makefile	Example Time class that overloads the +, <<, and >> operators
Example 2	LinkedList folder	Contains all the files for a LinkedList implementation of a List ADT. The ==, =, + and << operators are overloaded in the LinkedList class
Example 3	TreeNode.h	The Node specification for an Array implementation of a Tree
Example 4	BinaryNode.h	The Node specification for a Linked List implementation of a Tree
